GREGORY HAMILTON

Waleed Al-Aziz. In 1985, he masterminded the hijacking of TWA Flight 847, securing the release of 31 Lebanese political prisoners. He successfully brokered the sale of chemical weapons and dual-use technologies to Pakistan in 1987. In 1993, he acquired 54 of our own Stinger missiles in exchange for sensitive intel we have yet to determine the nature of. He later sold the missiles to Syria. Aziz plans to end his illustrious career by way of philanthropy. Langley tells us he's sired at least 13 charitable organizations, covertly providing the financial infrastructure for the 5 major terror networks. We've been tasked to trace the donations to their sources and build the necessary fiscal surveillance models. Apprehending Aziz is officially only a secondary objective. I want you to make it the first. Let's put this son of a bitch in the morgue. Get work done.
